iTechSQA is a Service-Disabled Veteran-Owned Small Business (SDVOSB) and Woman-Owned Small Business (WOSB) consultancy that delivers customized unified communications and network solutions to our Nation's most high-profile federal agencies. iTechSQA is a systems integrator that brings an innovative approach to solving mission critical challenges in and around the IT enterprise and communications environment.

Specifically, iTechSQA provides innovative IT and communications strategies as it relates to:

- Unified Communications and Collaboration
- Video Teleconferencing
- VOIP
- Datacenter Network Engineering
- AV Design and Implementation
- Software Development
- Application Development
- Desktop Support
- Inventory Management Solutions

iTechSQA provides and optimizes technology implementation for our clients by leveraging our technology reseller relationships to save our clients money while not sacrificing quality of service and experience.

With our decades of experience, iTechSQA Engineers and Program Managers are responsible for communicating complex technical topics from discovery, to application development and continuous process optimization. Our disciplined focus and methodology delivers enterprise-class solutions within prescribed timelines and budgets.

At its core, iTechSQA exists to serve and drive the success of the executives and agencies that fulfill many of our Nation's most important security, military and public health needs.
